## A global player

**Making a Difference all Around the World**

As an establishment which has completed hundreds of projects in different continents, BAUGRUP reaches out to the world its service oriented approach of prioritizing quality and by paying attention to the smallest details, such as the climate conditions of the project destination. Hence, the life span of the product is also guaranteed.

## GREAT FAÇADES DESERVE OUR FINISH

REDEFINING FAÇADES WORLDWIDE

## **Professional systems for individual facades**

Today, personal taste and individuality are expressed not only through design and appealing architecture, but also through the choice of color for the facade. BAUCOLOR range of paints combines the necessary aesthetic merits with high quality, economy and ecology.

In addition to being a design element, the facade paint also performs important protective functions. They provide the façade with reliable protection from wet, dirt and pollutants, and also perform a design role. The comprehensive palette of the BAUCOLOR comprises several hundred different colors.

Colour and architecture are inseparably linked, as it is colour which lends buildings a direct emotional appeal.

## **FACADE PAINTS & COATINGS**

### **Professional systems for Facades and exterior walls protection**

#### **Environmentally friendly facade primers and paints**

BAUCOLOR facade systems are based on innovative, systematically matched products and can be adjusted perfectly to any type of facade and construction material.

#### **Optimum protection**

Systematic facade protection is a prerequisite for long-lasting maintenance of the value of a building. In urban and industrial areas, facades are exposed to strong environmental impact. BAUCOLOR facade products provide long-term protection against aggressive airborne pollutants as well as against wind, cold and rain. In addition, the predominantly mineral constituents give high mechanical resistance to organically bound systems, which makes them ideal on any type of substrate.

#### **Excellent moisture protection**

Water is the biggest threat to facades. For this reason optimum protection of a facade starts with protection against water. The BAUCOLOR System is one of the most modern facade systems which provides high water-repelling effects while ensuring excellent diffusibility. This way moisture cannot penetrate into the brickwork and, as an additional advantage, dust is washed off the facade easily. In addition the BAUCOLOR System can be used with many different substrates because it combines mineral and organic properties.

#### **Cultural heritage protection and restoration**

It is weather-resistant and water vapor diffusible at the same time. Thus it is perfect for restoring historic and listed cultural heritage buildings.

# DORYA Ultra Glossy Exterior Paint

## DORYA Ultra Glossy

Acrylic Copolymer Resin Based, High-Covering,  
Uv Resistant, Gloss Exterior Paint

Available in all Colors by RAL

TEXTURE

It is styrene-acrylic copolymer based, special silicone reinforced, water based, smooth textured gloss paint. It perfectly covers the surface. It is glossy, able to respire, resistant to the sunlight, washable, water-repellent and long lasting.

It can be used on cement plaster, concrete and mosaic surfaces as well as on thermal insulation systems and self-supporting old surfaces.

DORYA MORE		DESCRIPTION & USAGE	PACKAGE (LT)	PRICE LIST (USD)	PRICE PER LT	PRICE PER 1 GAL	PRICE PER 5 GAL	COST PER M2 (USD)	COST PER FT2 (USD)

# VEGA Silicone Exterior Paint

## VEGA Silicone

Acrylic Resin Based, Silicone Reinforced, Uv-Resistant, Textured Exterior Covering

Available in all Colors by RAL

It is a textured (grained), silicone reinforced material composed of quartz particles, for exterior use. Silicone additives are included to the formula to increase the level of water repellency. It thus makes it ideal for painting the exterior surfaces of buildings located in rainy areas and under tough atmospheric conditions. It has an ability of respiration, is resistant to the sunlight, water-repellant and washable; it is also long lasting and perfectly penetrates to the surface. There are two types according to the size of granules; Vega BL (Thin grained), Vega BR (Thick grained). It can be used on cement plaster, concrete and mosaic surfaces as well as on thermal insulation systems and self-supporting old surfaces.

ÉŦĪĤĒĪĤ Ī Ī	DESCRIPTION & USAGE	PACKAGE (LT)	PRICE LIST (USD)	PRICE PER LT	PRICE PER 1 GAL	PRICE PER 5 GAL	COST PER M2 (USD)	COST PER FT2 (USD)
